# SECTION 5.0 PUBLIC PROTECTION MEASURES

The first priority in any emergency is to protect life. One of the key components of this is to protect the public. This section outlines the methods of public protection (Air Monitoring, Roadblocks, Site Security, Evacuation, Sheltering, Ignition and People outside the EPZ) each responder will be familiar with each protection method. This section will assist responders in determining the appropriate public protection method, and the criteria in which it should be used.

Contents:
