Date: Dec. 12, 2008 Time: 11 AM File number 92100-30-06527  
Name: Elmworth Energy Location: Noel, Hants Co.  
Address: 4880 No. 215 Hwy Activity: Natural Gas Exploration

Reason for inspection/observations/directions

Routine: Inspection associated with application for natural gas exploration well. Inspected site with T. Rushton of Dillon Consulting. There was no activity on site. An area 120m x 120m was cleared and grubbed and level. Capped wellhead was at the centre of the site. No odour evident.

Heavy rain was occurring, runoff was being diverted into the woods at the northwest corner and across the access road at the northeast corner. Clean runoff was being diverted around the bermed area (120x120).

Runoff ~~is~~ drains from the northeast to Noel Bay about 500 metres away.

Three 45g drums at entrance 2 empty - 1 full. Contents unknown.

Southwest corner appears to have a pile of drill cuttings, no oil or steel present.

Inspector: B. Matlock Date: Dec. 12, 2008
